Summary

Senior Full Stack Developer with 8+ years of experience **designing, developing, and optimizing high-performance web applications.**

Expertise in **React, Node.js, and full-stack architecture**, with a passion for **clean, scalable code and performance tuning.**

Strong background in **refactoring legacy systems, mentoring developers, and implementing best practices** to improve maintainability. Experienced in **architecting scalable, maintainable systems** that align with business and technical goals.

Experience

Little Star Media Ltd **December 2017 - Present**
Senior Software Developer Remote

- Applied DRY, SOLID, and refactoring techniques extensively, focusing on abstraction to maintain code quality using Jest unit tests.
- Mentored junior developers, served as the primary contact for unit testing, and promoted best practices across the team.
- Actively participated in Agile workflows, including the creation of epics, stories, tasks, and process documentation.

Little Star Media Ltd **March 2016 - December 2017**
Software Developer

- Adapted to evolving technology requirements, developing proficiency in React.js, Express, and Unit Testing.
- Involved in planning and developing a multi-repo platform to replace outdated WordPress applications. Next.js/React frontend, React/Material UI CMS, & Express backend.

Little Star Media Ltd **March 2014 - March 2016**
Frontend WordPress Developer

- Managed ongoing development of WordPress sites and HTML emails, establishing front-end skills.

Make Believe Media **2012 - 2014**
Freelance

- Designed websites for businesses in Cornwall, including managing online presence for Chy An Albany Hotel & Garrack Hotel.
- Built a portfolio showcasing skills that led to a transition to full-time development roles.
